

# QCM-I Mini

## Quartz Crystal Microbalance with Impedance Analysis

The **QCM-I Mini** is a high-sensitivity, mass sensing instrument, which probes the interactions of molecules, polymers and biological assemblies with surfaces, label-free and in real time. The measurement can be used to determine the hydrated mass and rigidity of nm to micron scale layers at the sensor surface, as well as fluid properties.

The measurement principle is based on impedance analysis of a quartz crystal sensor to determine the resonant frequency and bandwidth of the resonant conductance curve; fundamental and overtones. The bandwidth or full width at half maximum (FWHM) is directly correlated to the well-known dissipation (D.)

### Main features:

- Measures frequency and FWHM (or dissipation)
- Measures fundamental frequency and overtones up to 80 MHz
- Temperature control from 15°C to 65°C ( $\pm 0.02^\circ\text{C}$ )
- Electrochemical measurement options
- Modular sensor-holder for different sensor sizes
- Second Channel for a variety of External Modules
- Compact Instrument and PC with Windows® 10

### QCM Sensors and Holders

- Quartz crystal sensors with Au, Pt or high quality ITO electrodes and a wide range of coatings.  $\text{SiO}_2$ ,  $\text{TiO}_2$ , PDMS etc
- The modular sensor-holder can accept industry standard 14 mm or 1" diameter quartz crystals and other custom sizes.
- Electrochemical Flow-cell with a Pt-disc counter and leak-free Ag/AgCl reference electrode.
- External sensor-holder modules are available for a range of uses including: Pipette-filling, Immersion, Microscopy, Vacuum, High-pressure, Low-profile, etc.

### Control & Measurement

The **BioSense** software is a fully-functioned application platform, common to the whole analytical instrument range. It provides full control of the **QCM-I Mini** instrument, User accounts, data acquisition and display, storage and management, data processing and export. Addition of the electrochemical module incorporates control of the potentiostat and allows synchronized data acquisition.
