PIM-Mini-10 Pulsed Current Source — Datasheet

Precision Pulse Control

The Mini-10 is a compact and lightweight pulsed current source designed to drive laser diodes, bars, arrays, or any low-impedance load. The key specifications are output current from 1 A to 10 A, rise and fall times below 8 μ s at 10 A, pulse widths from 25 μ s to 4000 μ s, forward voltage from 0 V to 48 V, and pulse repetition rate from single shot to 5,000 Hz.

System Operation

The Mini-10 output current may be set with an internal potentiometer or an analog voltage. The pulse width is controlled with the input trigger signal.

The system requires two DC voltages for operation, 12 V and compliance voltage equal to 12 V above the laser diode's forward voltage.

Output Cable

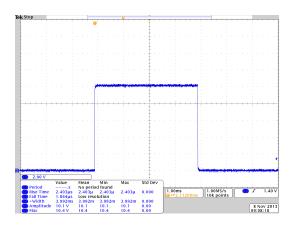

The laser or load is connected to the Mini-10 with 22 AWG twisted pair cable (included) with a length of 15 cm (6 inches) or less.

What is included?

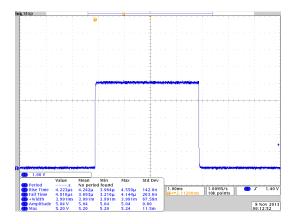

Mini-10

General

| Size (HxWxD) | 11.3 cm x 12.65 cm x 5.4 cm (4.425" x 4.975" x 2.125") |
|-------------------------|---|
| Weight | 0.5 kg (16 oz) |
| Mounting hole diameter | 4.5 mm (0.180") |
| Mounting hole placement | 3.49 cm x 11.6 cm (1.375" x 4.575") |
| Operating Temperature | 10°C to 40°C |
| Cooling | Convection air cooled |

Notes

Warranty—One year parts and labor on defects in materials and workmanship.

The Mini-10 current source meets or exceeds these specifications.

All specifications are measured with 10 cm of 22 AWG twisted pair wire connecting the Mini-10 to a low impedance/inductance load (HPL-2400-1.00).

Specifications subject to change without notice.
